	Examiner Mehmet B. Geckil	Art Unit 2142	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-21 are presented for examination.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anand et al (6,748,436)
4. Anand et al taught the invention substantially as claimed including a uniform interface for configuring and managing a plurality of different types of network devices, comprising:
 - a) a library (Figure 1A, element 171B, 172B) containing generic commands that can be applied to the network devices (col 6, line 34 et seq); and
 - b) a plurality of DLL modules interfaced with the libraries through library interfaces 171A, 171B, and 171C converts or maps and correlates the generic command to a specific platform commands or device specific commands and provides device specific commands to individual devices of a type that are associated with the module (col 6, line 15 et seq.)

Art Unit: 2142

5. It would have been obvious to one of ordinary skill in the networking art at the time of the invention that the claimed invention differed from the teachings of Anand et al only by a degree, e.g., in the claimed plug-in modules registering with the library but this is no more than a difference in a degree because the "plug-in" is no more than a name for the modules. Claim does not attach a specific functionality because it is "plug-in". As far as the registering language is concerned this is obvious variation of Anand et al's mapping function (see col 6, line 35 et seq.) Other claims are all obvious variations of the well known features of updating, converting or translating commands or configuration or the like, e.g., like obvious variations of Anand et al teachings.
